The country's  
leading brand  
of wet pour  
safety surfacing:  
tough, colourful  
and versatile

Redlynch offers an integrated service for the design and installation of safety surfaces, and the supply of play equipment, base preparations, fencing and other related items. **FlexiTop** is a two course wet pour system which protects by absorbing the impact of a fall. Slip resistant qualities in both wet and dry conditions also help avoid accidents and make it the ideal all weather playing surface.

Using state of the art Computer Aided Design, an exciting range of graphics can be created, suitable for large and small areas. Any number of themes can be devised and a wide choice of colours will bring life to playgrounds on the dullest days. Plain black is often used where budgets are restricted or where a colourful design is not essential.

**FlexiTop** is the ideal safety surfacing solution for indoor and outdoor leisure areas and is guaranteed to give years of service.

- **Fully tested to the methods laid out in EN1177 and meets the standards for free fall height, durability, slip resistance and flammability**
- **Sustainable construction featuring hard wearing EPDM rubber granules to provide the tough, non-slip wearing course over the base course of recycled truck tyres**
- **Installed only by our own specialist operatives**

Natural looking bark  
or wood chip formed from  
coloured rubber, bound  
together to stay in place

**TigerMulch** is a mixture of colour-coated shredded lorry tyre rubber and a specifically formulated polyurethane binder with the appearance of natural bark. Mixed up and wet-laid on site, **TigerMulch** forms an in situ surface that is incredibly strong. As the rubber is bound with the polyurethane, the shreds do not move out of place, providing a strong and durable surface.

The overall effect is to create a highly decorative surface that will do its job for many years. **TigerMulch** is a non-slip, impact absorbing safety surface which is slightly soft underfoot, making it a comfortable surface for pedestrians and strong enough to accommodate baby buggies and carriages. It can also be used for tree pits and other problem areas that are mud baths in winter but dust bowls in the summer.

A photograph of a playground featuring a large, rustic wooden climbing frame made of thick logs. The ground is covered in a thick layer of reddish-brown mulch. In the background, there is a brick building with many windows and some trees. The sky is overcast.

A highly decorative  
surface that will do its  
job for many years

CALL US NOW ON: 01249 444537

As well as its fabulous natural appearance **TigerMulch** has a number of other benefits:

- **Highly durable and long lasting**
- **Great non-slip properties**
- **Ground works are frequently less costly to prepare compared to other surfaces**
- **Very porous and free draining**

# SyntheTurf®

CALL US NOW ON: 01249 444537

**SyntheTurf** synthetic turf is the ideal all weather outside recreation safety surface. It looks incredibly realistic and is soft to the touch, making it especially suited for children's play areas. Clean and safe and reduces grounds maintenance, saving time and money.

**SyntheTurf** is perfect for the awkward areas which often turn to dust or mud, especially around trees. It can also be laid directly onto existing tarmac to provide a soft and colourful area in an otherwise dreary expanse of grey-black surfacing.

Safety surfacing  
synthetic turf  
for outside  
recreation; no  
mud & no mess

With its realistic appearance **SyntheTurf** is suitable for a wide range of applications, from playgrounds to courtyards.

- **Quality installation by our own highly experienced operatives**
- **Minimal maintenance to provide long term cost savings**
- **An excellent all year round play surface**
- **No mess – no wasted time clearing mud and dirt brought inside during wet weather**

# Rubber Scrub®

CALL US NOW ON: 01249 444537

Cleans and  
revitalises  
synthetic surfaces  
and restores  
non-slip qualities

Safety surfaces are designed to withstand active play in all weathers. But even the toughest surfaces need occasional maintenance to keep performing at the highest level. Using state of the art hot water power cleaning technology and a range of additives, **RubberScrub** cleans surfaces, kills moss and moulds and removes general filth and grime. Detritus is taken away from the interstices between the granules, removing the spores and improving the surface's drainage capabilities.

Our specially formulated biocides also include moss and algae growth inhibitors and slow release detergents that help prevent regrowth and maintain the cleanliness of the surface. No other process cleans so deeply and effectively to revitalise the non-slip qualities and refresh colours.

**CALL US NOW ON: 01249 444537**

Correctly installed and maintained, synthetic surfaces will last for years. Excessive use, mistreatment and vandalism can damage the material. Polyurethane-bound surfaces can shrink and scuff out. Carpets spilt, and bark often needs topping up. We can advise what the best course might be for your surfacing. Surfaces can often be repaired rather than replaced or just need a good clean.

## **Redlynch Leisure**

Redlynch Leisure is one of the UK's leading installers and innovators in the field of rubber-bound, in situ surfaces. Our staff have been installing these products since the 1970s, and we were formed in 1997, since when we have laid over 1 million square metres of polymeric surfaces.
